

Block Street

16 people live on Block Street:

6 red people, 3 blue people, 5 green people and 2 yellow people.

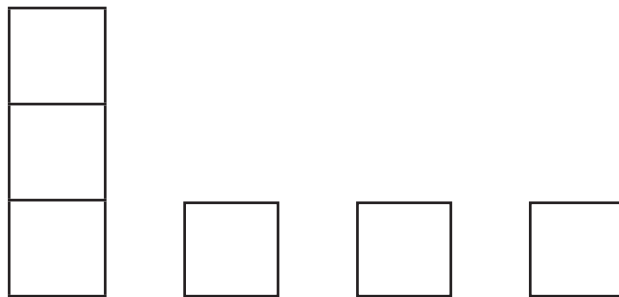

Place blocks on the street to show:

house = 1 block 

townhouse = 2 blocks of the same colour 

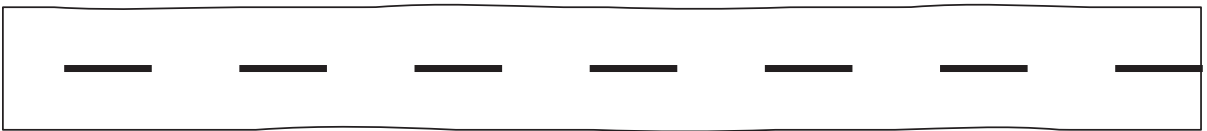

apartment = 3 blocks of the same colour 

For example,

1 apartment block, 3 houses
(for red people)

- Each person lives in a block. Make your street, placing houses, townhouses and apartments to show where the people live. Those with the same colour stay together.

- Using the same blocks, make a different looking street.
