

Learning Number Bonds With Pictures

A large green box on the left contains 6 sun icons arranged in two rows of three. A dashed line separates this from two smaller green boxes on the right. The top box contains 5 sun icons and is labeled with the number 5. The bottom box contains 1 sun icon and is labeled with the number 1. In the center, the equation $6 = 5 + 1$ is written.

A large green box on the left contains 9 pen icons arranged in two rows: the top row has 6 pens and the bottom row has 3 pens. A dashed line separates this from two smaller green boxes on the right. The top box contains 6 pen icons and is labeled with the number 6. The bottom box contains 3 pen icons and is labeled with the number 3. In the center, the equation $9 = 6 + 3$ is written.

A large green box on the left contains 7 carrot icons arranged in two rows: the top row has 4 carrots and the bottom row has 3 carrots. A dashed line separates this from two smaller green boxes on the right. The top box contains 5 carrot icons and is labeled with the number 5. The bottom box contains 2 carrot icons and is labeled with the number 2. In the center, the equation $7 = 5 + 2$ is written.

A large green box on the left contains 8 leaf icons arranged in two rows of four. A dashed line separates this from two smaller green boxes on the right. Both the top and bottom boxes contain 4 leaf icons and are labeled with the number 4. In the center, the equation $8 = 4 + 4$ is written.
